by removing the free choice of the people limiting what can be seen heard or read is a great injustice to americans . i have a right i believe its the first amendmendment to our constitution to listen to what i want and i want sattelite radio to go on and on . are we going to be a society of wal marts and no other competition because the small person has no money to compete against the giants . i feel that satalite radio whether xm or sirius should be left alone and the real problem america should be focused on is energy and education of our children spend the money on this and the return will be greater than any media program out there. thank you for your time and american taxpayer and a media lover tell the am and fm people to work harder on there programing if two little company scare them they should rea valuate what they are doing since they already are the giants sincerly ED STARK
